

# ATTENTION ALL CANDIDATES!

On October 14 I will vote for a candidate that supports clean, safe publicly-delivered drinking water, a ban on bulk water exports, and the creation of a National Water Policy.

# 88%

**of Canadians agree** that Canada should adopt a comprehensive National Water Policy that recognizes clean drinking water as a basic human right and also bans the bulk export of fresh water.

*(Results according to an Environics Research Group poll conducted for the Council of Canadians April 7-10, 2008 of 1,007 respondents with a margin of error of +/-3.09 per cent 19 times out of 20.)*
